

# eHealth Innovation Days: Coming soon!

We announce the **FIRST eHEALTH INNOVATION DAYS** on

8<sup>th</sup> and 9<sup>th</sup> September 2016 (noon to noon)

at FUAS's Audimax lecture theatre complex. This conference will offer a platform for networking, for creating new partnerships and exchanging knowledge and experience. Four sessions and an exhibition will show the potential of eHealth for improving the Health Care Systems:

1. Science and Research
2. Hospitals and Best Practise
3. Companies and Success Stories
4. User Involvement and Usability.

Excellent Speaker from the Baltic Sea Region (BSR) and the Netherlands will be in place for discussions with the auditorium. This will create the opportunity to see what we can expect of the eHealth market in the years to come and explore the limits of what is possible.

At Flensburg University of Applied Sciences (FUAS) we have seen our role as that of an "eHealth bridge" in the BSR in the past and continue to do so. We focus on that region, because the Baltic Sea Region (BSR) can safely be called a pioneer in the field of eHealth.

Until 2019 the "Baltic Sea Campus on eHealth" will be set up at the Institute for eHealth and Management in Healthcare. By establishing this new brand we aim to focus both research and teaching on the Baltic Sea Region. The first endeavour of this new brand will be the "eHealth Innovation Days!

For further details, please visit [www.ehealth-innovation.net](http://www.ehealth-innovation.net). Registration is already open!
